

**FOUR LEVELS OF SOFTWARE TO MEET YOUR NEEDS**

| <b>SNAP</b>  | <b>PowerPoll</b>   | <b>wInquiry</b>   | <b>ARS Pro</b>   |
|--|--|---|--|
| <p>Automatically places polling triggers in your PowerPoint Presentation.</p> <p>Automatically provides a 10 second countdown clock</p> <p>Controls PowerPoint</p> <p>Saves individual &amp; summary data to Excel Spreadsheet</p> | <p>Active X controls that you place on your PowerPoint question page where you want the graph to appear.</p> <p>Provides more options for countdown timers and graph displays.</p> <p>You are responsible for saving the data within the presentation after the event. Data is displayed, printed with the presentation.</p> <p>Results can be totally anonymous or you can set a file to capture individual data to a comma delimited file that can be used in Excel or Access.</p> | <p>Windows based package that provides you with a lot of flexibility for many different types of applications, including instant test results, test results by topic and testing in a game show.</p> <p>There are a lot of options and advanced features that provide flexibility and support for polling – dual screen operation, ability for dual graphs, instant test scoring, voting (individual or weighted), games (individual, teams, rounds, wagering, etc.), sub-group filtering (splitting data based on demographics, impromptu questions, dual polling (for two people to share a keypad), scripted displays for scoring/special filter displays, support of video file display (any format that can be played with DirectX),</p> <p>Wide variety of reporting and export of data for sharing in other formats (Excel, database, spreadsheet, PowerPoint, HTML, etc.)</p> | <p>ARS Pro is the software package for the professional who wants to take polling and presentation integration to the highest level available. ARS Pro takes the power and flexibility of our most advanced polling features and combines them with the power of Microsoft's PowerPoint Presentation package for a complete interactive audience presentation and data collection experience. ARS Pro works with all models of keypads that ARS supports.</p> <p>Integrated PowerPoint control allows you to quickly and easily integrate any existing PowerPoint presentation into ARS Pro. Polling may occur on top of any PowerPoint slide in an impromptu or pre-programmed fashion. You can control whether data will be displayed on top of the slide or on a separate full screen response slide.</p> <p>A more advanced text editor allows text editing on top of a graphic background, or questions can be created in PowerPoint for use. All elements are integrated into the easy-to-use tabbed user interface.</p> <p>Wide variety of reporting and export of data for sharing in other formats (Excel, database, spreadsheet, PowerPoint, HTML, etc.)</p> |
